Valuation Haircuts Supplement

30 March 2026

DOCUMENTATION ON MONETARY POLICY INSTRUMENTS AND PROCEDURES

SUPPLEMENT

on valuation haircuts applied in the implementation of the Eurosystem Monetary policy framework issued by the Central Bank of Ireland (the “Bank”) on 25 January 2016 (as amended with effect from 30 March 2026) (the “Valuation Haircuts Supplement”)

This Supplement is supplemental to, and should be read in conjunction with, the Bank’s Documentation on Monetary Policy Instruments and Procedures dated 30 March 2026, as the same may be amended, varied or further supplemented from time to time (the “MPIPs”).

All of the provisions of the MPIPs shall continue to apply unaltered unless otherwise provided for by this or any other Supplement. Terms defined in the MPIPs, unless the context otherwise requires, shall have the same meaning when used in this Supplement. The valuation haircuts in this Supplement are those that were adopted by the Governing Council of the ECB and set out in Guideline ECB/2015/35, as amended by Guideline ECB/2016/32, Guideline ECB/2018/4, Guideline ECB/2019/12, Decision ECB/2020/20, Guideline ECB/2020/46, Guideline ECB/2022/18, Guideline ECB/2022/49, Guideline ECB/2024/5 and Guideline ECB/2026/2.

Article 1

Valuation haircuts applied to eligible marketable assets

1. In accordance with Title VI of Part Four of the MPIPs, marketable assets shall be subject to valuation haircuts, as defined in Article 2(103) of the MPIPs, at the levels set forth in Table 2 and Table 2a in the Annex to this Valuation Haircuts Supplement.
2. The valuation haircut for a specific asset depends on the following factors:
 - (a) the haircut category to which the asset is allocated, as defined in Article 2;
 - (b) the residual maturity or the weighted average life of the asset, as defined in Article 3;
 - (c) the coupon structure of the asset; and
 - (d) the credit quality step to which the asset is allocated.

3. No valuation haircut shall be applied to ECB debt certificates and debt certificates issued by NCBs prior to the date of adoption of the euro in their respective Member State whose currency is the euro.

Article 2

Determination of haircut categories for marketable assets

Eligible marketable assets shall be allocated to one of the five haircut categories, based on the type of issuer and/or the type of asset, as reflected in Table 1 in the Annex to this Valuation Haircuts Supplement:

- (a) debt instruments issued by central governments, debt instruments issued by the European Union and debt certificates issued by NCBs of Member States whose currency is not the euro are included in haircut category I;
- (b) debt instruments issued by: (i) local and regional governments; (ii) entities which are credit institutions or non-credit institutions classified by the Eurosystem as agencies and which meet the quantitative criteria set out in Annex XIIa of the MPIPs; (iii) multilateral development banks and international organisations other than the European Union; as well as legislative covered bonds and *multi cédulas*, are included in haircut category II;
- (c) debt instruments issued by (i) non-financial corporations, (ii) corporations in the government sector, and (iii) agencies which are non-credit institutions that do not meet the quantitative criteria set out in Annex XIIa of the MPIPs, are included in haircut category III;
- (d) unsecured debt instruments issued by: (i) credit institutions; (ii) agencies which are credit institutions that do not meet the quantitative criteria set out in Annex XIIa of the MPIPs; and (iii) financial corporations other than credit institutions, are included in haircut category IV;
- (e) asset-backed securities are included in haircut category V, regardless of the classification of the issuer.

Article 3

Valuation haircuts for marketable assets

1. The valuation haircuts for marketable assets allocated to haircut categories I to IV shall be determined based on:
 - (a) the allocation of the specific asset to credit quality step 1, 2 or 3;
 - (b) the residual maturity of the asset as detailed in paragraph 2;

- (c) the coupon structure of the asset as detailed in paragraph 2.
2. For marketable assets allocated to haircut categories I to IV, the applicable valuation haircut shall depend on the residual maturity and coupon structure of the asset (fixed/floating or zero), as determined based on Table 2 in the Annex to this Valuation Haircuts Supplement. The relevant maturity for determining the valuation haircut to be applied shall be the residual maturity of the asset, irrespective of the type of coupon structure.
- 2a. The determination of the residual maturity for own-use covered bonds shall depend on whether the own-use covered bonds have a soft bullet structure or a conditional pass-through structure, as follows:
- (a) in the case of own-use covered bonds with a soft bullet structure, the residual maturity shall be defined as the maximum length to which the maturity may be extended as reflected in the terms and conditions for the specific covered bond;
 - (b) in the case of own-use covered bonds with a conditional pass-through structure, the residual maturity shall correspond to the [10-15) year category.

For the purposes of this paragraph 2a, 'own-use' shall mean the submission or use by a counterparty of covered bonds that are issued or guaranteed by the counterparty itself or by any other entity with which that counterparty has close links as determined in accordance with Article 138 of the MIPs.

3. For marketable assets allocated to haircut category V, regardless of their coupon structure, the valuation haircuts shall be determined based on the weighted average life of the asset as detailed in paragraphs 4 and 5. The valuation haircuts applicable to marketable assets in category V are laid down in Table 2a in the Annex to this Valuation Haircuts Supplement.
4. The weighted average life of the senior tranche of an asset-backed security shall be estimated as the weighted average time remaining until repayment has been made for that tranche. For retained mobilised asset-backed securities, the calculation of the weighted average life shall assume that issuer call options will not be exercised.
5. For the purposes of paragraph 4, 'retained mobilised asset-backed securities' shall mean asset-backed securities used in a percentage greater than 75% of the outstanding nominal amount by a counterparty that originated the asset-backed security or by entities closely linked to the originator. Such close links shall be determined in accordance with Article 138 of the MIPs.

Article 4

Additional valuation haircuts applied to specific types of marketable assets

In addition to the valuation haircuts laid down in Article 3 of this Valuation Haircuts Supplement, the following additional valuation haircuts shall apply for specific types of marketable assets:

- (a) all marketable assets allocated to haircut categories II, III, IV and V that are theoretically valued in accordance with the rules contained in Article 134 of the MIPs shall be subject to an additional valuation haircut in the form of a valuation markdown. The valuation markdown, also for own-use covered bonds, shall depend on the expected residual maturity or, in the case of haircut category V, the weighted average life of the asset, at the levels set out in Table 4 in the Annex to this Valuation Haircuts Supplement. For the purpose of computing the valuation markdown for own-use covered bonds, the expected residual maturity, shall be the originally scheduled maturity date unless and until a maturity extension has been triggered;
- (aa) marketable assets denominated in pounds sterling, yen or US dollars shall be subject to an additional valuation markdown of: (a) 16% on assets denominated in pounds sterling or US dollars; and (b) 26% on assets denominated in yen;
- (b) own-use covered bonds shall be subject to an additional valuation haircut of (i) 8% applied to the value of the debt instruments allocated to credit quality steps 1 and 2, and (ii) 12% applied to the value of the debt instruments allocated to credit quality step 3. For the purposes of this paragraph (b), 'own-use' shall have the same meaning as 'own use' as defined in Article 3(2a);
- (c) if the additional valuation haircut referred to in paragraph (b) cannot be applied with respect to a collateral management system of the Bank, triparty agent, or TARGET for auto-collateralisation, the additional valuation haircut shall be applied in such systems or platform to the entire issuance value of the covered bonds that can be own used.

Article 5

Valuation haircuts applied to eligible non-marketable assets

1. Individual credit claims shall be subject to specific valuation haircuts determined according to the residual maturity, the credit quality step and the interest rate structure as laid down in Table 3 in the Annex to this Valuation Haircuts Supplement.
2. The following provisions shall apply with respect to the interest rate structure of credit claims:
 - (a) 'zero coupon' credit claims shall be treated as fixed rate credit claims;
 - (b) floating rate credit claims with a resetting period longer than one year shall be treated as fixed rate credit claims;

- (c) floating rate credit claims with a ceiling shall be treated as fixed rate credit claims;
- (d) floating rate credit claims with a resetting period of one year or less and with a floor, but without a ceiling, shall be treated as floating rate credit claims;
- (e) the valuation haircut applied to a credit claim with more than one type of interest payment shall depend only on the interest payments during the remaining life of the credit claim. If there is more than one type of interest payment during the remaining life of the credit claim, the remaining interest payments shall be treated as fixed-rate payments, with the relevant maturity for the haircut being the residual maturity of the credit claim. If the credit claim agreement contains any options to change the type of interest payment during the remaining life of the credit claim, or if the credit claim agreement provides for any changes of the type of interest payment during the remaining life of the credit claim that are contingent upon the occurrence of a predefined event, the remaining interest payments shall also be treated as fixed-rate payments, with the relevant maturity for the haircut being the residual maturity of the credit claim.

[Paragraphs 3, 4 and 5 are deleted]

6. Fixed-term deposits shall not be subject to valuation haircuts.

[Paragraph 7 is deleted]

Annex

Table 1: Haircut categories for eligible marketable assets based on the type of issuer and/or type of asset
