(1) For “Insurance undertakings which simultaneously pursue both life and non-life insurance activities” in AS4a and AS4b, the AS4a notification data is based on a legal status of life vs non-life, whereas the AS4b EIOPA cross-border report data provides a more granular split of firm categories.

(2) Aggregate data from AS12 to AS22c does not include Third-Country Branches

(3) For AS19-AS19f, data on the Solvency Capital Requirement by risk module and sub module does not include information on undertakings with ring fenced funds or matching portfolios, since data on the Solvency Capital Requirement is only available at entity level for these undertakings due to the nature of their calculation.

(4) In respect of the relevant risk (sub) modules, 100% of the associated capital requirement has been included in the calculation for all firms which have indicated in their Regular Supervisory Report that reassessments of the credit quality steps of the larger or more complex exposures have been conducted.

(5) Due to the fact that the entity to whom the single capital add-on applies is publicly known, the Bank does not consider it appropriate to disclose the quantum of the add-on.
